SMALLS

## CRQSH CPJs

Cap Junky is a modern hybrid bred from Alien Cookies and Kush Mints #11, recognized for a highly expressive, terpene-forward aromatic profile led by limonene's bright citrus character, supported by  $\beta$ -caryophyllene's warm spice and linalool's soft floral complexity.

The flowers are dense and well-structured, featuring heavy trichome coverage that gives the buds a distinctly frosted, resin-rich appearance. Visually, Cap Junky presents a vivid mix of deep greens with purple accents, reinforcing the cultivar's premium quality and potency-driven look. The aroma becomes immediately apparent, while the dry pull reveals a clear blend of zesty citrus and warm spice.

CRQSH SMALLS line offers smaller buds in a compact size range of approximately 1.5 cm to 2.5 cm, delivering the same quality, potency, and purity as larger flowers – because size doesn't matter.

Patient-reported experiences associated with cultivars in this profile often describe a balanced effect, combining an uplifting mental tone with gradual physical ease. Such varieties are frequently referenced in the context of stress reduction and decompression, commonly chosen in the late afternoon or evening when both clarity and relaxation are desired.

**HANG DRIED | HAND TRIMMED | SLOWLY CURED | HAND PACKED | NON-IRRADIATED**

**LINEAGE:** Alien Cookies x Kush Mints #11

**TERPENE PROFILE:**  $\approx$  3,5 %
