Canada

HANG DRIED | HAND TRIMMED | SLOWLY CURED | HAND PACKED | NON-IRRADIATED

## CRQSH GAPS

CRQSH Gas Pack smalls is a potent hybrid created from the cross of Cap Junky and Platinum Bred. Its aroma profile is intense and complex, characterized by pronounced gas and diesel notes, complemented by fermented fruity nuances as well as subtle spicy, peppery, and lightly woody undertones that add depth and complexity to the overall profile.

The flowers are presented as small, dense "Smalls" distinguished by their compact structure and abundant resin production. A sparkling layer of trichomes covers the buds, highlighting the cultivar's high-quality character. The distinctive gas-forward aroma is immediately noticeable and reflects the cultivar's characteristic terpene profile, creating a pronounced sensory experience.

CRQSH SMALLS line offers smaller buds in a compact size range of approximately 1.5 cm to 2.5 cm, delivering the same quality, potency, and purity as larger flowers – because size doesn't matter.

Patients commonly describe cultivars with this profile as physically relaxing while maintaining mental clarity. In addition to promoting a sense of calm and balance, reports frequently mention enhanced focus, mood elevation, and a reduction in mental tension. CRQSH GAPS is often associated with evening use, stress reduction, relaxation, and support during periods of rest. Some patients also report experience with this cultivar in the context of chronic pain, muscle tension, and general physical or mental fatigue.
